invites applications for the position of:

ENGINEERING TECHNICIAN / SENIOR ENGINEERING TECHNICIAN

SALARY:	\$27.52 - \$36.77 Hourly
DEPARTMENT:	Ventura Water
DIVISION:	Ventura Water Resource Planning
OPENING DATE:	10/06/22
CLOSING DATE:	10/26/22 05:30 PM
THE POSITION:	

The City of Ventura Water Department is looking to for an **Engineering Technician/Senior Engineering Technician** to join our award-winning team! If you are looking for a great opportunity to demonstrate your GIS skillset and grow your experience, this position may be for you.

This classification is flexibly staffed, and the position may be filled at either level depending on the qualifications of the incumbent and the staffing needs of the city.

WHAT YOU'LL DO

The Engineering Technician/Senior Engineering Technician utilizes Geographic Information Systems (GIS) applications including ArcGIS Pro and ArcGIS online to maintain Ventura Water's Electronic Atlas (E-Atlas) of the water, wastewater, and reclaimed water systems. This technician updates and verifies information, performing field inspections and obtaining information from surveys and maintenance staff. Working to synchronize the GIS, asset management software and hydraulic models, the Engineering Technician/Senior Engineering Technician collaborates with the Utility Asset Management System Specialist to update attributes in the asset management system. This position is responsible for responding to requests from developers, contractors and the general public related to construction and maintenance involving the Water Department.

WHO YOU ARE

You have a desire to join a dedicated team committed to providing the highest level of customer service to citizens of the City of Ventura!

Through education, training and/or experience you can:

- read and interpret engineering drawings
- write clearly and succinctly in preparing correspondence and a variety of other communication settings
- build appropriate rapport, listening with intent and responding appropriately even when in disagreement
- use rigorous logic and methods to solve difficult problems with effective solutions
- establish and maintain working relationships with staff, developers, contractors, and the general public
- interpret standard plans, specifications, survey notes, and statistical information and apply them to specific cases

- perform engineering calculations; and perform independent technical research within area of assignment
